

# CLOK 5G Shroud for Flat Panel Radios

The CLOK 5G is a protective pole side shroud that supports and conceals Small Cell flat panel remote radio heads (RRH). It is designed for mounting to the sides of utility and street lighting poles. An aesthetically pleasing design and several color options appease municipal requirements for radio concealment and enable faster deployments.

## Features

- Discrete shroud per radio reduces overall deployment size while giving the flexibility to deploy a different number of radios at each node
- Full deployment is three radios spaced 120° apart
- Made of durable, lightweight ABS for minimizing overall impact on pole loading
- Decorative transition pieces to fill space between shrouds and conceal cabling that are adjustable to accommodate different diameter poles
- Cutout for 5G antenna face for optimum RF transmission
- The radio can be color matched to the shroud/pole with die cut to size 3M film for the radio antenna

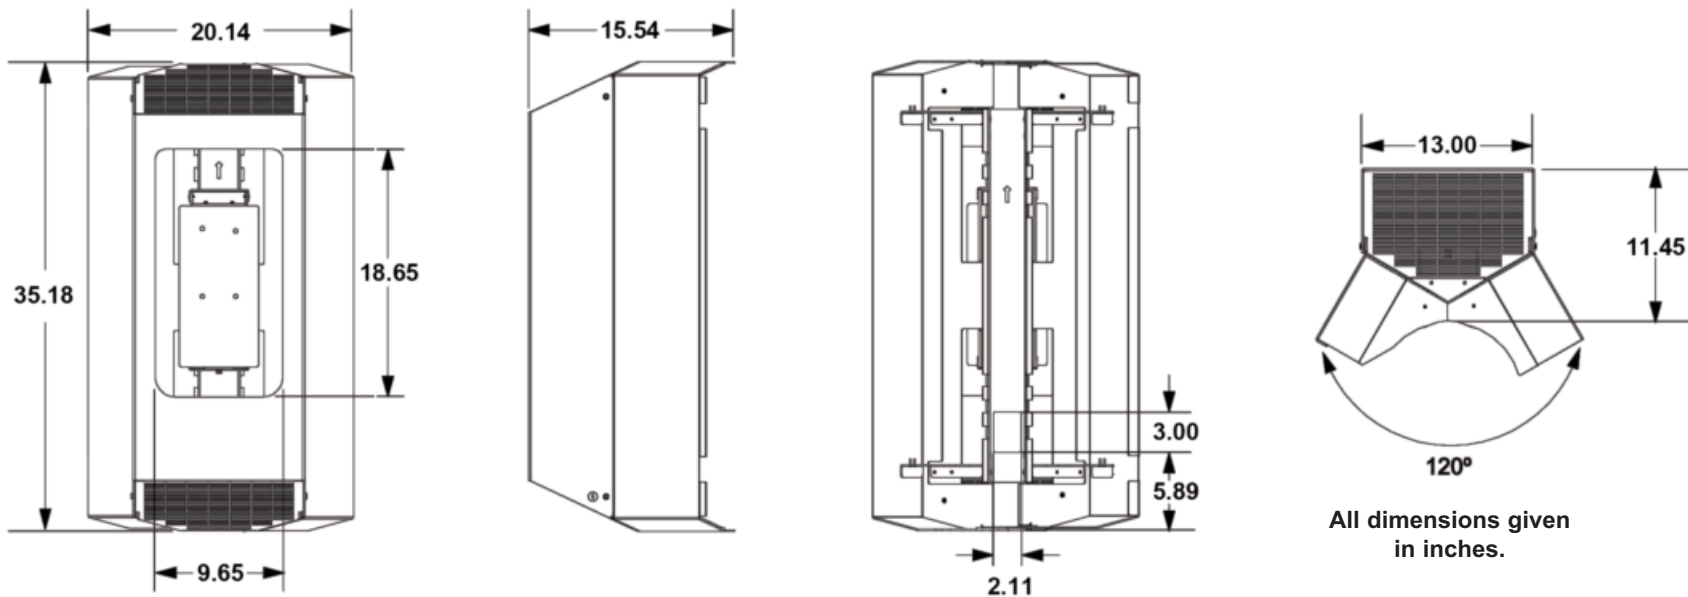

## Specifications

<b>Dimensions:</b>	35"Hx29"Wx16"D
<b>Weight:</b>	42 lbs. (approx.) as shipped. 64 lbs. with radio. Total weight for all three CLOKs and radios: 192 lbs. (approx.)
<b>Materials:</b>	Wrap: 0.125" ABS Transition plates, top and bottom vented panels: 0.090" aluminum Radio bracket, gussets, and spine assembly: 12GA steel
<b>Radios Supported:</b>	Ericsson AIR 1218, Ericsson StreetMacro 6701 and Samsung 5G NR AU
<b>Operating Temp. Range, Outside Enclosure:</b>	-40° to +115° F/-40° to +46° C
<b>Operating Temp. Range, Inside Enclosure:</b>	-40° to +131° F/-40° to +55° C
<b>Humidity:</b>	0 to 95% (non-condensing)
<b>Altitude:</b>	Up to 2,000 meters (6,560 feet)
